The future begins with the vision we create today...

Neighborhood House of Milwaukee

2012 Annual Report

Throughout all the years, one constant has sustained us...

Since our founding in 1945, the mission of Neighborhood House of Milwaukee has been to build a strong community by **strengthening individuals, families, and the neighborhood**. While our mission has remained constant, the challenges of our community are forever shifting. In the early years, we focused on meeting the recreational needs of young people and children in order to "... set them on the road towards responsibility and constructive citizenship." Soon thereafter, we broadened services to include educational programming, outdoor environmental education, literacy services, and more.

As our history shows, we are continuously called upon to think creatively, design new programs, and find additional resources to help the children and families we serve build a better a future for themselves and our community. This year was no exception. We launched the Personal Responsibility Education Program (PREP), introduced the Active Early 2.0 project in our early childhood classrooms, expanded S.T.E.A.M. curriculum in the

University Kids Club program, and addressed budget pressures at the International Learning Center by restructuring class offerings. Throughout all the years, throughout all the changes one constant has sustained us: YOU. Your time, your energy, and your financial support empower children and families to move beyond the barriers of poverty, gain self-sufficiency and realize their full potential. You build the future today. Thank you for your support.

Roman A. Draba Board President

Richard C. Cox Executive Director

Orchand Cox

Building Strong Foundations

EARLY CHILDHOOD SERVICES (ECS)

Serving more than 120 children annually, Neighborhood House's fully licensed child-care center and early childhood educational programming has been recognized throughout the community for its outstanding ability to create a positive educational environment that challenges young minds, increases self-esteem and encourages personal responsibility.

Programming is play-based and focused on school readiness with developmentally appropriate lessons covering core subject areas such as math, science and reading. The recent introduction of the evidence-based Second Step Social/Emotional curriculum further enhances school readiness by building self-esteem, combating bullying and teaching children how to positively interact with others.

Neighborhood House is also proud to have been chosen as one of only two sites to participate in the Active Early 2.0 project of the national campaign to prevent childhood obesity. The Active Early 2.0 project encourages the development of life-long healthy living habits in children ages 2-5.

Building Hopeful Futures

PROGRAMS FOR SCHOOL AGE YOUTH

University Kids Club (UKC) is a high-quality before- and after-school program for children ages 7-12. UKC provides school age children and youth with a variety of academic enrichment and recreational opportunities designed to improve academic achievement, promote healthy lifestyles, and strengthen life skills. Building on Neighborhood House's longstanding focus on outdoor environmental education, an expanded focus on science, technology, engineering, arts, and math (S.T.E.A.M) curriculum was initiated. In one project, UKC kids spent the spring learning the core physics of movement, designing rockets using found materials (2 liter bottles, old plastic eggs, etc) and then headed out to the nature center for the inaugural rocket launch. The launch did not go off without a hitch: one ended nose down in a grassy field.

Community Learning Center (CLC) at Albert Story School in Milwaukee's urban core is a partnership with Milwaukee Public Schools. The CLC serves about 290 K4-8th grade students with many participants coming from refugee families served by the NH International Learning Center. The CLC offers a mix of academic enrichment and recreational opportunities similar to those offered by

UKC. During the summer, CLC programming was moved from Albert Story School allowing further integration of the CLC into core NH programming. CLC children and youth participated in the PREP program, outdoor environmental education programming at the NH Nature Center, and weekly field trips.

Summer Day Camp provides school-age vouth daily enrichment activities for ten. fun-filled weeks each summer. Participants benefit from a wide array of activities focused on academic enrichment, Outdoor/Environmental education, sports/recreation, and character building/community service. In 2011, many activities centered around a Magnificent Mammals theme. Through study and observation, program participants learned to identify midwestern mammals, understand their role in the ecosystem, and how we inter-relate with each other. Building on their observations made at the NH Nature Center, campers headed to Chicago's Brookfield Zoo for a day exploring their prairie animal habitat. In addition, over the summer each youth transformed a fallen branch into a totem featuring animals that personified themselves and their family.

Fostering Healthy Relationships

Personal Responsibility Education Program (PREP)

Operating under the youth friendly motto: *Money! Power! Respect!* the Personal Responsibility Education Program (PREP) focuses on financial fitness, making proud and responsible choices, and healthy relationships as tools to prevent teen pregnancy and sexually transmitted diseases, including HIV/AIDS.

In its inaugural year, PREP developed and sustained strong partnerships with Milwaukee Public Schools and community organizations like the AIDS Resource Center of Wisconsin. The program hit the ground running with more than 270 youth, ages 10-19 participating in classroom based curriculum, summertime experiential learning activities, and the first Got Money! Conference.

Building Character

TEENS ON THE MOVE

The Teens on the Move program focuses on empowering teens to make healthy choices, avoid or reduce drug and alcohol use, engage in education, develop leadership skills, and make positive contributions to the community.

With over 160 active participants between the ages of 13 and 19, the Teens on the Move program is continually evolving to capture the interest of participants and remain relevant. Our youth leadership council works in cooperation with staff to continually update and implement fun and educational programs.

This year, in cooperation with the Hmong American Family Association, the teens wrote and performed a play about the consequences of alcohol abuse for a teen dancer. Safe Skate Nights, which communicate positive messages in a party atmosphere, were introduced with much success. Young entrepreneurs were mentored by business owners through a partnership with the Metropolitan Asssociation of Commerce, and the youth completed community service projects with both SHARE Milwaukee and the Milwaukee Rescue Mission.

Rebuilding Lives in a New Land

INTERNATIONAL LEARNING CENTER (ILC)

Neighborhood House's International Learning Center (ILC) directly serves over 600 refugees a year and benefits hundreds more family members. They come from over 25 different countries, many from war-torn or famine-ravaged Somalia, Burma, the Congo, and Liberia. The ILC continues to serve generations of Hmong, Vietnamese, and Lao refugees displaced after the Vietnam War.

The majority of students served have little or no prior education in English or their own tongue. The ILC's English as a Second Language program focuses on life skills and emerging literacy skills for parenting, working, and becoming a citizen.

The ILC also has an award-winning licensed on-site pre-school. Home visits by preschool staff provide immigrants with crucial parenting support. Referrals for trauma counseling, medical needs, and job and school support are also offered.

The ILC's Citizenship Program, one of only 3 area citizenship programs to have Site Recognition and Accreditation by the U.S. Board of Immigration Appeals, continues to expand with 42 students passing the citizenship exam this year. A newly developed citizenship class for older adults will begin operations at Washington Park Senior Center in early 2013.

Building a Broader Vision by Connecting with the Natural World

OUTDOOR AND ENVIRONMENTAL EDUCATION PROGRAM (OEE)

Central to the NH mission, Outdoor Environmental Education (OEE) is infused throughout all NH youth and family programs. Extraordinary facilities that include an in-house science lab, an award-winning urban garden & play habitat, and 93-acre nature center located in Dodge County offer a wide array of opportunities to explore and learn.

For more than 40 years, the annual spring maple sugaring program has been a favorite of young and old. This year was a challenging maple sugaring year. Despite the best efforts of 650 community members the maple grove yielded only 500 gallons of sap that boiled down to only 10 gallons of syrup! The low volume was a disappointment for our entrepreneurial teens who traditionally sell the syrup at NH events.

However, the teens stayed active building a new Team Challenge course at the nature center which is designed to promote cooperation, communication, and team work as participants conquer the many physically and mentally challenging activities. A fun-filled, character building activity for years to come!

The Chequamegon-Nicolet National Forest was the playground for several NH youth who participated in the **Urban Connections Conservation program** throughout the summer. Unforgettable experiences include: swimming in a lake for the first time, making campfires, and hearing wolves howl! Teen Program Supervisor James Austin summed it up this way: "This is an experience that will go with them the rest of their lives. They're going to tell their children about this and they're going to push their children to go out to nature and go out to camp. That's one of the things that every child in the urban environment should take part in."

The beloved NH Nature Center, the site of many memorable learning experiences, continues to battle with garlic mustard, wild parsnip, and other invasive species. In partnership with the Bureau of Land Management, we are eradicating these invaders through our multi-phase Prairie Restoration Project.

Building a Healthier Community

Community Health Improvement for Milwaukee's Children (CHIMC)

Neighborhood House is first and foremost a safe haven and healthy environment for urban children and families to thrive. That is why NH programs have been on the front line in addressing lifestyle and health care issues since the very beginning. Our Community Health Improvement for Milwaukee's Children (CHIMC) community-based health project aimed at reducing health disparities and eliminating vaccine-preventable childhood diseases in Milwaukee neighborhoods is one such effort. Funded by the National Institutes of Health-National Industry for Minority Health and Health Disparities, the CHIMC project is a collaboration between local residents, academic partners, and community organizations to increase immunization rates in the communities surrounding Neighborhood House.

Since its inception in 2005, CHIMC has worked with the families of more than 1,500 Milwaukee Children. As a result of the CHIMC program, parents surveyed show a 10% increase in both attitude toward and active involvement in their children's immunizations. Also, parents reporting awareness of accessible healthcare options increased 26%.

2012 CHIMC highlights include:

- Hosted our 4th annual Community Health Fair with community partners to provide information and health services to the general public
- Worked with 64 parents with children less than 4 years old to increase their completion rate for the full schedule of recommended immunizations
- Surveyed 200 parents who participated in CHIMC and found a significant increase in positive attitudes and opinions about immunizations
- Established a partnership with the United Neighborhood Centers of Milwaukee (UNCOM) to communicate CHIMC findings throughout metropolitan Milwaukee
